Subject Index

Canadian Journal of Animal Science, Volume 87, 2007

Absorption, **651**
Acute phase response
  direct-fed microbials for feedlot steers, 251
Adipocyte
  luteinizing hormone and leptin profiles in feed-restricted prepuberal gilts, 191
Akofeed fat
  broiler diets with various levels of amylose, fat and processing, 553
Amino acid
  amino acids digestibility in yeast extract and plasma, 381
  digestible nutrients in short-season corn, 221
  nutritional value of DDGS for swine, 103
Amylose-lipid complex
  broiler diets with various levels of amylose, fat and processing, 553
Animal variation
  methane emissions from pasture-fed cows, 601
Antioxidant
  effect of α-tocopherol on in vitro culture of bovine embryos, 539
Apoptosis
  bull influence on embryo apoptosis and gene expression, 157
Association
  a *Dde*I PCR-RFLP detecting genetic variation of goat, 13
Attachment
  rumen bacteria in corn silage feeding, 259

Backgrounding
  corn or soybean hull incorporation into haylage-based diets, 615
Bacteria
  rumen bacteria in corn silage feeding, 259
Bacterial protein meal
  bacterial protein and tryptophan for silver fox, 93
Barley
  broiler diets with various levels of amylose, fat and processing, 553
  grain source, silage level, and body weight on beef quality, 167
Batch culture, in vitro
  essential oils and in vitro rumen fermentation, 413
Beef
  enhancing CLA content of beef, 71
  total CLA determination in fat, 181
  vitamin B_{12} in beef muscle, 277
Beef steer, **649**
Behaviour
  maternal behaviour and mammary health in dairy ewes, 469
  pre-slaughter management and carcass microbial quality, 479
  stall width and sow size affect sow behaviour, 129
  stress response of steers to short-haul transport, 291
Biopsy
  mammary biopsy in sows, 281
Blood metabolite
  feeding lactation cows raw or roasted soybeans, 441
Body size
  stall width and sow size affect sow behaviour, 129
Broiler
  wheat-soybean diets plus phytase for broilers, 563
  xylanase in diets for pigs and broilers, 227

Calcium, **653**
Canola
  extruded canola seed-pea blend for poultry, 115
Carcass
  effect of raising lambs in a cold or warm environment, 29
  leptin SNP – effects on performance in beef cattle, 153
Carcass and meat quality
  amino acid effects on intramuscular fat, 303
Carcass characteristics, **648**
Carcass hygiene
  pre-slaughter management and carcass microbial quality, 479
β-carotene
  supplementation of lactating ewes, 185
Cattle
  bull influence on embryo apoptosis and gene expression, 157
  chlortetracycline and estrogen on cattle growth, 327
  effect of α-tocopherol on in vitro culture of bovine embryos, 539
  improving enteric methane estimates, 459
  limit-feeding high-energy barley-based diet for cattle, 385
  nutrient digestibility, fecal output and eating behaviour of cattle, 393
  turnout date and cattle weight gain, 527
Cattle, beef **648**
  corn or soybean hull incorporation into haylage-based diets, 615
  dietary bentonite in feedlot steers, 631
  direct-fed microbials for feedlot steers, 251
  enhancing CLA content of beef, 71
  feeding time and thermoregulation of beef cattle, 307
  grain source, silage level, and body weight on beef quality, 167
  leptin SNP – effects on performance in beef cattle, 153
  methane abatement strategies for cattle, 431
  sunflower seeds in pasture and feedlot diets, 15
Cattle, dairy, **651**
  dietary flaxseed and prostaglandins, 343
  dietary phosphorus in lactating dairy cows, 639
  dosing the rumen with *R. flavefaciens* NJ and probiotics, 237
  essential oils and in vitro rumen fermentation, 413
  fat sources for the transition cow, 591
  feeding lactation cows raw or roasted soybeans, 441
  methane emissions from pasture-fed cows, 601
  milk yield performance in dairy cows, 285
  on-farm phosphorus budget, 407
  restriction-refeed model for dairy cows, 455

Page numbers in **bold** refer to abstracts.

Cellulolytic populations
dosing the rumen with *R. flavefaciens* NJ and probiotics, 237
Chance-constrained programming, **647**
Chick, broiler
xylanase in diets for pigs and broilers, 227
Chlortetracycline
chlortetracycline and estrogen on cattle growth, 327
Ciliate protozoa
copper in sheep, 401
Cold
effect of raising lambs in a cold or warm environment, 29
Colostrum
genotype effects on sow colostrum and milk composition, 511
sow colostrum and milk utilization, 571
Conjugated linoleic acids
enhancing CLA content of beef, 71
total CLA determination in fat, 181
Copper
copper in sheep, 401
Corn
digestible nutrients in short season corn, 221
grain source, silage level, and body weight on beef quality, 167
Corn silage
rumen bacteria in corn silage feeding, 259
Cortisol
stress response of steers to short-haul transport, 291
Cysteine
methionine and cysteine ratio for growing pigs, 87

Daily gain
floor space allowance for grower-finisher pigs, 139
Davis growth model, **648**, **649**
Dairy operations, intensive
dietary phosphorus in lactating dairy cows, 639
Degradation ratio
rumen degradation ratios of normal and frost-damaged wheat, 449
Deposition
methionine and cysteine ratio for growing pigs, 87
Diet
methane abatement strategies for cattle, 431
Digestibility
amino acids digestibility in yeast extract and plasma, 381
digestible nutrients in short season corn, 221
nutritional value of DDGS for swine, 103
wheat-soybean diets plus phytase for broilers, 563
Digestibility, in sacco
dosing the rumen with *R. flavefaciens* NJ and probiotics, 237
Digestibility, in vitro, **647**
Digestible energy
total lysine/digestible energy ratio for weaned pigs, 45
Digestion, **651**
Direct-fed microbials
direct-fed microbials for feedlot steers, 251
Discount
a new look at energy discounts, 57
Disappearance, in situ
brown midrib millet cell wall, 421
Distiller's dried grains with solubles
nutritional value of DDGS for swine, 103
Drug release, controlled internal
estrous synchronization in muskoxen, 535
Duck
enzyme supplementation in duck diets, 199

Egg composition
dietary lutein and flax on laying hens, 365
Embryo
bull influence on embryo apoptosis and gene expression, 157
effect of α-tocopherol on in vitro culture of bovine embryos, 539
Emission factor
improving enteric methane estimates, 459
Energy
digestible nutrients in short season corn, 221
nutritional value of DDGS for swine, 103
sow colostrum and milk utilization, 571
supplementation of lactating ewes, 185
Energy and nitrogen metabolism
enzyme supplementation in duck diets, 199
Energy supplementation
corn or soybean hull incorporation into haylage-based diets, 615
Ensiling
forage soybean silage quality, 623
Enteric fermentation
improving enteric methane estimates, 459
Environment
effect of raising lambs in a cold or warm environment, 29
Environmental pollution
dietary phosphorus in lactating dairy cows, 639
Enzyme
whole wheat for laying hens, 579
Enzyme-immunoassay
progesterone stability in bovine whole milk, 123
Escherichia coli phytase
E. coli derived phytase decreases total and soluble P output, 353
Essential oil
essential oils and in vitro rumen fermentation, 413
Estrogen
chlortetracycline and estrogen on cattle growth, 327
Estrous synchronization
estrous synchronization in muskoxen, 535
Exogenous enzymes
enzyme supplementation in duck diets, 199
Expander-pelleting treatment
broiler diets with various levels of amylose, fat and processing, 553
Experimental bias, **648**

Fasting
pre-slaughter management and carcass microbial quality, 479
Fat
methane abatement strategies for cattle, 431
total CLA determination in fat, 181
Fat deposition, **648**
Fatty acid
dietary N-3 fatty acids for hens, 373
fat sources for the transition cow, 591
Fatty acid profile
enhancing CLA content of beef, 71
Faecal output
nutrient digestibility, fecal output and eating behaviour of cattle, 393

Feed efficiency
limit-feeding high-energy barley-based diet for cattle, 385
Feed intake
methane emissions from pasture-fed cows, 601
Feed restriction
restriction-refeed model for dairy cows, 455
Feeding
feeding time and thermoregulation of beef cattle, 307
Feedlot
enhancing CLA content of beef, 71
dietary bentonite in feedlot steers, 631
direct-fed microbials for feedlot steers, 251
Fertility
bull influence on embryo apoptosis and gene expression, 157
First-order digestion rate, **647**
Fixed effects, **648**
Flaxseed
dietary flaxseed and prostaglandins, 343
dietary lutein and flax on laying hens, 365
fat sources for the transition cow, 591
Forage millet
brown midrib millet cell wall, 421
Forage quality
forage soybean silage quality, 623
Fusarium mycotoxins
fusarium mycotoxicoses in turkeys, 543

Gas production, **647**
Gene expression
bull influence on embryo apoptosis and gene expression, 157
Gestation stall
stall width and sow size affect sow behaviour, 129
GH gene
GH, *H-FABP* and *HSP72*, 503
Glucagon, **651**
Glucose metabolism, **651**
Goat
a *Dde*I PCR-RFLP detecting genetic variation of goat, 13
Grain texture
whole wheat for laying hens, 579
Grass silage, **647**
dietary bentonite in feedlot steers, 631
Greenhouse gases
improving enteric methane estimates, 459
methane abatement strategies for cattle, 431
methane emissions from pasture-fed cows, 601
Group size
preslaughter handling, welfare and pork quality, 3
Grower-finisher
floor space allowance for grower-finisher pigs, 139
Growth
chlortetracycline and estrogen on cattle growth, 327
effect of raising lambs in a cold or warm environment, 29
glyphosate-tolerant canola and pork quality, 517
total lysine/digestible energy ratio for weaned pigs, 45
Growth hormone
chlortetracycline and estrogen on cattle growth, 327
Growth performance
amino acid effects on intramuscular fat, 303
dietary bentonite in feedlot steers, 631

H-FABP gene
GH, *H-FABP* and *HSP72*, 503
Heart rate
stress response of steers to short-haul transport, 291
Heat stress
mammary gland involution in sows, 35
Hematocrit
stress response of steers to short-haul transport, 291
Hepatic FSR
fusarium mycotoxicoses in turkeys, 543
HSP72 gene
GH, *H-FABP* and *HSP72*, 503

Incubation, in situ, **647**
Interferon
bull influence on embryo apoptosis and gene expression, 157
Intestinal flora
gut flora characterization using RISA, 207
International Panel on Climate Change
improving enteric methane estimates, 459
Insulin, **651**
Isotricha
copper in sheep, 401

Kinetics, **652**

Lactation
genotype effects on sow colostrum and milk composition, 511
mammary biopsy in sows, 281
maternal behaviour and mammary health in dairy ewes, 469
Lactation length
mammary gland involution in sows, 35
Lactational performance
feeding lactation cows raw or roasted soybeans, 441
Lamb
copper in sheep, 401
effect of raising lambs in a cold or warm environment, 29
parasitic infection and protein synthesis, 315
Layer, **653**
dietary lutein and flax on laying hens, 365
whole wheat for laying hens, 579
Leptin
leptin SNP – effects on performance in beef cattle, 153
luteinizing hormone and leptin profiles in feed-restricted prepuberal gilts, 191
Leucine
amino acid effects on intramuscular fat, 303
Leukotriene B_4
dietary N-3 fatty acids for hens, 373
Lifetime production efficiency
progeny residual feed intake and dam productivity, 489
Limit feeding
limit-feeding high-energy barley-based diet for cattle, 385
nutrient digestibility, fecal output and eating behaviour of cattle, 393
Linoleic acids, conjugated
enhancing CLA content of beef, 71
total CLA determination in fat, 181
Lipid
methane abatement strategies for cattle, 431
Liver abscesses
limit-feeding high-energy barley-based diet for cattle, 385
Lutein
dietary lutein and flax on laying hens, 365
Luteinizing hormone
luteinizing hormone and leptin

profiles in feed-restricted prepuberal gilts, 191
supplementation of lactating ewes, 185
Lysine
amino acid effects on intramuscular fat, 303

Male effect
estrous synchronization in muskoxen, 535
Mammary gland, **652**
mammary biopsy in sows, 281
Mammary infection
maternal behaviour and mammary health in dairy ewes, 469
Mammary involution
mammary gland involution in sows, 35
Manure
on-farm phosphorus budget, 407
Maternal behaviour
maternal behaviour and mammary health in dairy ewes, 469
Measurement technique
milk yield performance in dairy cows, 285
Meat quality
amino acid effects on intramuscular fat, 303
Mechanical processing
rumen bacteria in corn silage feeding, 259
Methane
improving enteric methane estimates, 459
methane abatement strategies for cattle, 431
methane emissions from pasture-fed cows, 601
Methionine
methionine and cysteine ratio for growing pigs, 87
Microbial contamination
preslaughter handling, welfare and pork quality, 3
Milk
sow colostrum and milk utilization, 571
Milk composition
genotype effects on sow colostrum and milk composition, 511
Milk production
fat sources for the transition cow, 591
milk yield performance in dairy cows, 285
Milk progesterone
progesterone stability in bovine whole milk, 123
Milk yield
a *Dde*I PCR-RFLP detecting genetic variation of goat, 13
restriction-refeed model for dairy cows, 455
supplementation of lactating ewes, 185
Millet
brown midrib millet cell wall, 421
Mineral retention
wheat-soybean diets plus phytase for broilers, 563
Model, **647** , **651**, **653**
on-farm phosphorus budget, 407
Muscle
vitamin B_{12} in beef muscle, 277
Muskoxen
estrous synchronization in muskoxen, 535

Net energy for lactation
a new look at energy discounts, 57
Nitrogen
sow colostrum and milk utilization, 571
Nitrogen balance
methionine and cysteine ratio for growing pigs, 87
Non-starch polysaccharides
xylanase in diets for pigs and broilers, 227
Nutrient degradability
forage soybean silage quality, 623
Nutrient digestibility
nutrient digestibility, fecal output and eating behaviour of cattle, 393
Nutrient variation, **647**
Nutrition
luteinizing hormone and leptin profiles in feed-restricted prepuberal gilts, 191
Nutritive value
extruded canola seed-pea blend for poultry, 115

Operant conditioning
thermal preference of pigs weaned at 12–14 days of age, 299
Optimal rumen fermentation
rumen degradation ratios of normal and frost-damaged wheat, 449
Ovarian function
dietary flaxseed and prostaglandins, 343
Ovibos moschatus
estrous synchronization in muskoxen, 535

Palatability attributes
grain source, silage level, and body weight on beef quality, 167
Parameter estimation, **648**
Parasite infection
parasitic infection and protein synthesis, 315
Pasture
enhancing CLA content of beef, 71
methane emissions from pasture-fed cows, 601
turnout date and cattle weight gain, 527
Pea
extruded canola seed-pea blend for poultry, 115
Pennisetum glaucum (L.) R. Br.
brown midrib millet cell wall, 421
Performance
bacterial protein and tryptophan for silver fox, 93
effect of raising lambs in a cold or warm environment, 29
Phenolic acids
brown midrib millet cell wall, 421
Phenylalanine, **652**
Phosphorus, **651**, **653**
E. coli derived phytase decreases total and soluble P output, 353
dietary phosphorus in lactating dairy cows, 639
on-farm phosphorus budget, 407
Phylogenetic evolution
GH, *H-FABP* and *HSP72*, 503
Phytase
wheat-soybean diets plus phytase for broilers, 563
Pig
amino acids digestibility in yeast extract and plasma, 381
digestible nutrients in short season corn, 221
floor space allowance for grower-finisher pigs, 139
glyphosate-tolerant canola and pork quality, 517
luteinizing hormone and leptin profiles in feed-restricted prepuberal gilts, 191
methionine and cysteine ratio for growing pigs, 87
nutritional value of DDGS for swine, 103
preslaughter handling, welfare and pork quality, 3
preslaughter management and carcass microbial quality, 479
stall width and sow size affect sow behaviour, 129

thermal preference of pigs weaned at 12–14 days of age, 299
total lysine/digestible energy ratio for weaned pigs, 45
xylanase in diets for pigs and broilers, 227
Piglet
gut flora characterization using RISA, 207
sow colostrum and milk utilization, 571
Plasma
vitamin B_{12} in beef muscle, 277
Plasma metabolites
restriction-refeed model for dairy cows, 455
Pollution, 653
Polymerase chain reaction
gut flora characterization using RISA, 207
Polymorphism
a *Dde*I PCR-RFLP detecting genetic variation of goat, 13
Polyunsaturated fatty acids
sunflower seeds in pasture and feedlot diets, 15
Pork quality
glyphosate-tolerant canola and pork quality, 517
preslaughter handling, welfare and pork quality, 3
Post-partum period
maternal behaviour and mammary health in dairy ewes, 469
POUIF1 gene
a *Dde*I PCR-RFLP detecting genetic variation of goat, 13
Poultry
extruded canola seed-pea blend for poultry, 115
Preslaughter handling
preslaughter handling, welfare and pork quality, 3
Probiotic
dosing the rumen with *R. flavefaciens* NJ and probiotics, 237
gut flora characterization using RISA, 207
Profitability, **650**
Progesterone stability
progesterone stability in bovine whole milk, 123
Propionate, **651**
Prostaglandin
dietary flaxseed and prostaglandins, 343
Protein
methionine and cysteine ratio for growing pigs, 87
Protein synthesis, **652**
parasitic infection and protein synthesis, 315
Protozoa, ciliate
copper in sheep, 401

Ration formulation, **647**
Reactive oxygen species
effect of α-tocopherol on in vitro culture of bovine embryos, 539
Recovery period
turnout date and cattle weight gain, 527
Reproduction
fat sources for the transition cow, 591
Reproduction, cow
progeny residual feed intake and dam productivity, 489
Reproductive efficiency
on-farm phosphorus budget, 407
Residual feed intake, **649**
progeny residual feed intake and dam productivity, 489
Retail acceptability
sunflower seeds in pasture and feedlot diets, 15
RISA profile
gut flora characterization using RISA, 207
Rotational grazing
turnout date and cattle weight gain, 527
Rumen
copper in sheep, 401
Rumen digestion
methane emissions from pasture-fed cows, 601
Rumen fermentation
dosing the rumen with *R. flavefaciens* NJ and probiotics, 237
essential oils and in vitro rumen fermentation, 413
rumen bacteria in corn silage feeding, 259
Ruminant, **651**
Ruminococcus flavefaciens NJ
dosing the rumen with *R. flavefaciens* NJ and probiotics, 237

Serotonin
bacterial protein and tryptophan for silver fox, 93
Shear force
grain source, silage level, and body weight on beef quality, 167
Sheep
maternal behaviour and mammary health in dairy ewes, 469
Sheep reproduction
supplementation of lactating ewes, 185
Silage
forage soybean silage quality, 623
Silage, corn
rumen bacteria in corn silage feeding, 259
Silage, grass, **647**
dietary bentonite in feedlot steers, 631
Silver fox
bacterial protein and tryptophan for silver fox, 93
Slaughter endpoint
grain source, silage level, and body weight on beef quality, 167
Sodium bentonite
dietary bentonite in feedlot steers, 631
Soluble phosphorus
E. coli derived phytase decreases total and soluble P output, 353
Sow
genotype effects on sow colostrum and milk composition, 511
mammary biopsy in sows, 281
mammary gland involution in sows, 35
stall width and sow size affect sow behaviour, 129
Soybean
forage soybean silage quality, 623
feeding lactation cows raw or roasted soybeans, 441
Soybean meal
enzyme supplementation in duck diets, 199
Soy oil
broiler diets with various levels of amylose, fat and processing, 553
Space allowances
floor space allowance for grower-finisher pigs, 139
Spray-dried plasma protein
amino acids digestibility in yeast extract and plasma, 381
Stall
stall width and sow size affect sow behaviour, 129
Starch
broiler diets with various levels of amylose, fat and processing, 553
Steer
beef steer, **649**
stress response of steers to short-haul transport, 291

Stochastic modelling, **650**
Stomach
  pre-slaughter management and carcass microbial quality, 479
Stomach weight
  preslaughter handling, welfare and pork quality, 3
Storage conditions
  progesterone stability in bovine whole milk, 123
Stress
  preslaughter handling, welfare and pork quality, 3
  stress response of steers to short-haul transport, 291
Stress, heat
  mammary gland involution in sows, 35
Sucking
  maternal behaviour and mammary health in dairy ewes, 469
Swine
  E. coli derived phytase decreases total and soluble P output, 353
  growth, **650**

Temperature preference
  thermal preference of pigs weaned at 12–14 days of age, 299
Thermoregulation
  feeding time and thermoregulation of beef cattle, 307
Thrombocyte
  dietary N-3 fatty acids for hens, 373
Thyroid
  chlortetracycline and estrogen on cattle growth, 327
Tibiotarsus mineralization
  wheat-soybean diets plus phytase for broilers, 563
α-Tocopherol
  effect of α-tocopherol on in vitro culture of bovine embryos, 539
Total lysine
  total lysine/digestible energy ratio for weaned pigs, 45
Transgenic canola
  glyphosate-tolerant canola and pork quality, 517
Transportation, 664
  stress response of steers to short-haul transport, 291
Tryptophan
  bacterial protein and tryptophan for silver fox, 93
Turkey performance
  fusarium mycotoxicoses in turkeys, 543
Turnout date
  turnout date and cattle weight gain, 527
Tyrosine, **652**

Udder and teat conformation
  milk yield performance in dairy cows, 285

Vaccenic acid
  enhancing CLA content of beef, 71
Vitamin B_{12}
  vitamin B_{12} in beef muscle, 277

Weaning
  gut flora characterization using RISA, 207
  mammary gland involution in sows, 35
Weaning, early
  thermal preference of pigs weaned at 12–14 days of age, 299
Weight gain
  turnout date and cattle weight gain, 527
Welfare
  bacterial protein and tryptophan for silver fox, 93
  floor space allowance for grower-finisher pigs, 139
Wheat
  enzyme supplementation in duck diets, 199
  whole wheat for laying hens, 579
Wheat, frost damaged
  rumen degradation ratios of normal and frost-damaged wheat, 449

Xylanase
  xylanase in diets for pigs and broilers, 227

Yak
  GH, *H-FABP* and *HSP72*, 503
Yeast extract
  amino acids digestibility in yeast extract and plasma, 381
